

LE MATERIEL EN CHIMIE – La schématisation

tube à essai

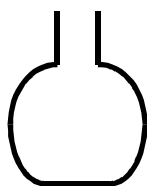

éprouvette graduée

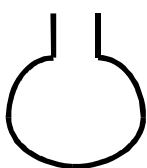

erlenmeyer

verre à pied

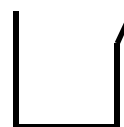

ballon à fond plat

ballon à fond rond

cristallisateur

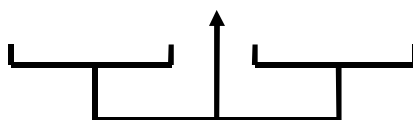

bécher

spatule

agitateur

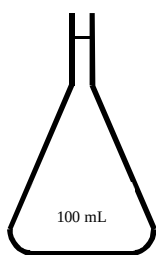

balance de Roberval

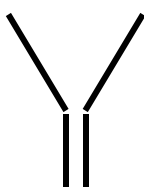

compte-goutte

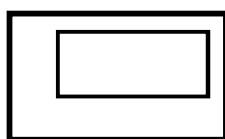

pipette graduée

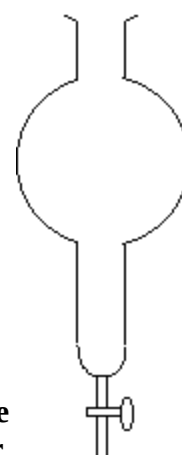

fiolle jaugée

entonnoir

balance électronique

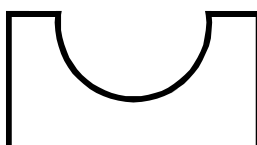

ampoule à décanter

capsule

verre de montre

chauffe-ballon

bouchon plein

bouchon percé

tube

Sur un schéma en chimie,
les instruments ne sont pas représentés en perspective mais EN COUPE
